# ACTIVE BRAKING SAFETY FOR ELECTRIC AND HYBRID VEHICLES

## Our commitment

Hella Pagid is one of the leading brake suppliers on the independent spare parts market with a comprehensive range.

Parent company TMD Friction's experience in the development of original equipment brake pads dates right back to 1878, guaranteeing you the highest degree of quality, safety and comfort. This applies to both PAGID OE brake pads as well as Hella Pagid brake pads on the independent spare parts market.

Hella Pagid offers more than 14,000 products for almost all brands and models on the market. Furthermore, Hella Pagid offers the right brake pads for more than 85% of all electric and hybrid vehicle models. In addition, suitable brake discs are already available for almost 70% of all electric and hybrid models available on the market today.

## Brake pads for electric and hybrid vehicles

All Hella Pagid brake pads for electric and hybrid vehicles meet the highest requirements in terms of brake performance, comfort and durability.

Environmental protection and compatibility already play an important role in contemporary product development.

The copper content of the brake pads is of particularly high relevance here. Hella Pagid has set itself the goal of converting its worldwide range to copper-free brake pads with a maximum copper content of 0.5% in relation to the total weight.

The front and rear axle brake pads for all electric and hybrid vehicles already meet these strict requirements today and feature the corresponding leaf symbol (N - copper-free). The copper-free formula of the brake pads is not only environmentally friendly, but has also been designed precisely for the respective vehicle types, brake systems, engine performance, driving loads and braking characteristics.

Electric and hybrid vehicles have one thing in common – their linear torque development enables them to reach high speeds in the shortest possible time, which is why excellent braking performance is important.

The friction lining formula takes this into account. The company has tested the properties for coefficient of friction, pedal pressure and hot wear in its own research and development centre. In addition, the brake pads exceed the current requirements set out in ECE regulation 90.

This brochure provides a small selection of our extensive range of brake pads and brake discs for electric and hybrid vehicles.

# HIGH-CARBON BRAKE DISCS FOR ELECTRIC AND HYBRID VEHICLES

Hella Pagid offers high-strength, high-carbon brake discs especially for very powerful electric and hybrid vehicles with a driving performance at sports car level, but are considerably heavier than sports cars as a result of their batteries. The increased carbon content enables optimum braking performance even in extreme situations thanks to its rapid heat dissipation.

## Low levels of fading

Optimum braking performance even in extreme situations thanks to faster heat dissipation of the high-strength grey cast iron.

## Reduced braking noise

Best noise damping properties thanks to increased carbon content.

## Fewer disc blows

The deformation is reduced by the improved thermal conductivity of the high carbon material. The result: less vibration. Smooth braking.

## Safe protection

The paint permanently protects the pot and outer ring from corrosion and is also more resistant to rim cleaner.

## OE standard

The high-carbon material meets OE quality standards.

## Increased braking comfort

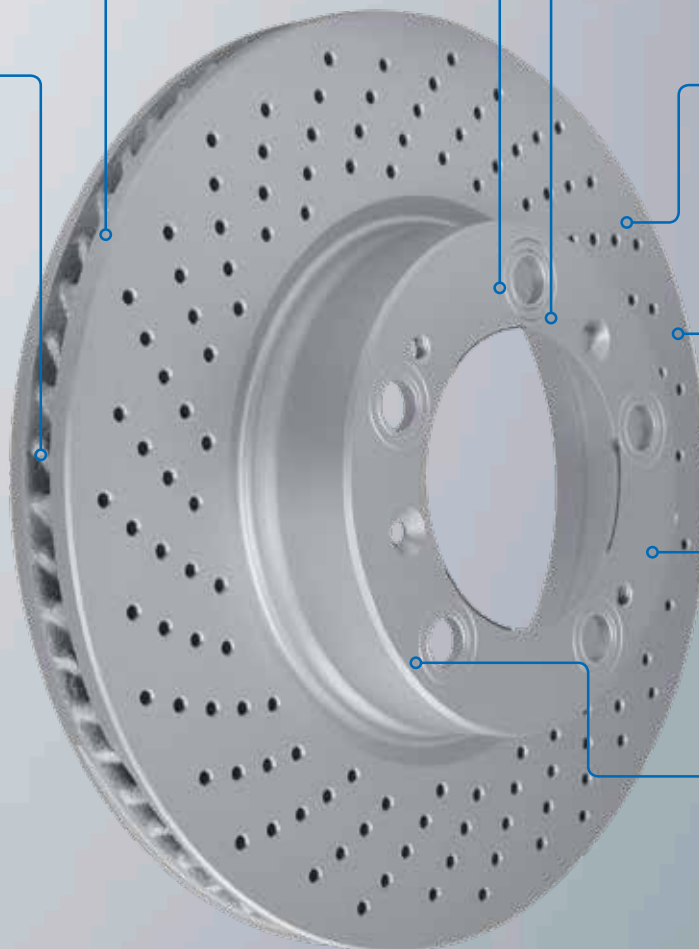

The best tolerance values make braking safer and more direct.

## Time-saving installation

There is no need to remove protective oil thanks to the coating. This means that the brake disc can be installed immediately.

## Environmentally friendly coating

The coating consists of a special, water-based paint that is ecologically completely harmless.

# FIND THE RIGHT PRODUCT WITH EASE

Learn more about our products: use our "BrakeGuide" online spare parts catalogue and our mobile app to access our complete product range at any time from your PC, smartphone or tablet and identify the right product for your vehicle.

**Online spare parts catalogue**  
 The BrakeGuide is based on weekly TecDoc data updates and offers garages an intuitive and targeted identification of brake parts from the Hella Pagid range. In addition, customers can independently create individual catalogues in the typical Hella Pagid catalogue layout.  
[www.brakeguide.com](http://www.brakeguide.com)

### Mobile BrakeGuide app

The Hella Pagid Brake Systems catalogue app facilitates spare part identification and simplifies processes in garages and at wholesalers. Available for iOS and Android!
